Dear Hiring Team,

I am writing to apply for the position of **Research Developer**, as referred by a friend. With a background as a **Junior Web Developer (WordPress)** at Scellecnt Innovation, I have developed a solid foundation in web technologies and a deep curiosity for learning more advanced areas of development and research.

My experience taught me the importance of building clean, functional web solutions while staying adaptable to new tools and challenges. I am someone who genuinely enjoys trying new things and exploring emerging tech. This mindset has driven me to continuously improve and stay updated with the latest in development and research trends.

What excites me about this role is the opportunity to work in an environment that encourages exploration and learning—two things I value deeply. I am eager to contribute my dedication, technical skills, and hunger to grow, while learning from experienced professionals in the field.

Thank you for considering my application. I look forward to the opportunity to speak further about how I can contribute to your team.

Best regards,
Pranav A.S
